

The new flip up **Modus** comes as the result of the long experience of Caberg, the first Italian company to produce a flip up helmet and design helmets with revolutionary functional characteristics. **Modus** is equipped with an innovative opening system, which, thanks to a rototraslation movement, allows in opening position, to have the chin guard much closer to the shell compared to traditional flip up helmets on the market. This feature reduces the head wind effect and prevents the accidental closing of the chin guard. Moreover, thanks to this particular chin guard movement, **Modus** has been homologated with the P/J dual homologation (full face and Jet) that allows the motorcyclist to ride either with the chin guard closed or open. As of Caberg tradition, **Modus** is equipped with the integrated sunvisor very easy to use that allows always to ride with the perfect light and therefore with maximum safety. The inner sunvisor is antiscratch and UV 400 treated, while the clear one is antiscratch with Pin Lock double lens that assures the absence of misting also during tough weather conditions. Two vents on top and one on the chin guard guarantee a great ventilation inside the helmet. **Modus** is also equipped with two air extractors on the back to ease the discharge of hot and stale air. The lining is completely removable and washable, realized with hypoallergenic and transpiring fabrics. The cheek pads have been studied with 3D technology to offer a more enveloping and comfortable fit and equipped with glasses seating to ease the accommodation of spectacles. Moreover, in order to facilitate the visibility of the motorcyclist by night and assure more safety, we added refractive inserts on the neck devise. **Modus** is preset for Caberg JUST SPEAK wireless communication system, which allows to communicate not only with your own cell phone and your passenger, but also to connect to a GPS system, listen to music trough a MP3 player. JUST SPEAK is equipped with Bluetooth profile A2DP that allows high quality audio stereo.

Outer shell:

Thermoplastic material with high resistance to crash impacts.

Ventilation:

Frontal air vent with anti mist visor system, top vent and two air extractors on the back.

Lining:

Completely removable and washable lining with hypoallergenic and transpiring fabrics treated sanitized. Cheek pad with double density 3D technology.

Visors:

Double Visor Tech

- Antiscratch visor with Pinlock lens with silicone profile included
- Antiscratch and UV 400 inner sun visor

Fastening:

Micrometric buckle

Colours:

Metal black, matt black, matt anthracite, silver, metal white .
HI-VIZION (yellow flu) version
Graphic version DUALE with bright finishing.

Sizes:

XS-S-M-L-XL

Homologation:

Ece 22.05 Double Homologation P/J

Weight:

1700 +/- 50 gr.
